SRI SHAKTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

ABSTRACT

The Alumni Association platform connects alumni, students, and the institution through a unified web and mobile system. It enables verified alumni registration, professional networking, mentorship, job sharing, and career guidance. An integrated resume analyser helps students improve job readiness. The platform also supports event management and showcases alumni achievements, promoting long-term engagement, career development, and institutional growth.

PROBLEM STATEMENT

Alumni engagement in many institutions is weak due to the absence of a centralized digital platform. Alumni data is scattered across social media and outdated records, limiting networking, mentorship, and career support. This disconnect prevents effective event management, job referrals, and transparent alumni contributions. Hence, a secure and scalable alumni association platform is needed to connect alumni, students, and institutions through a unified web and mobile system.

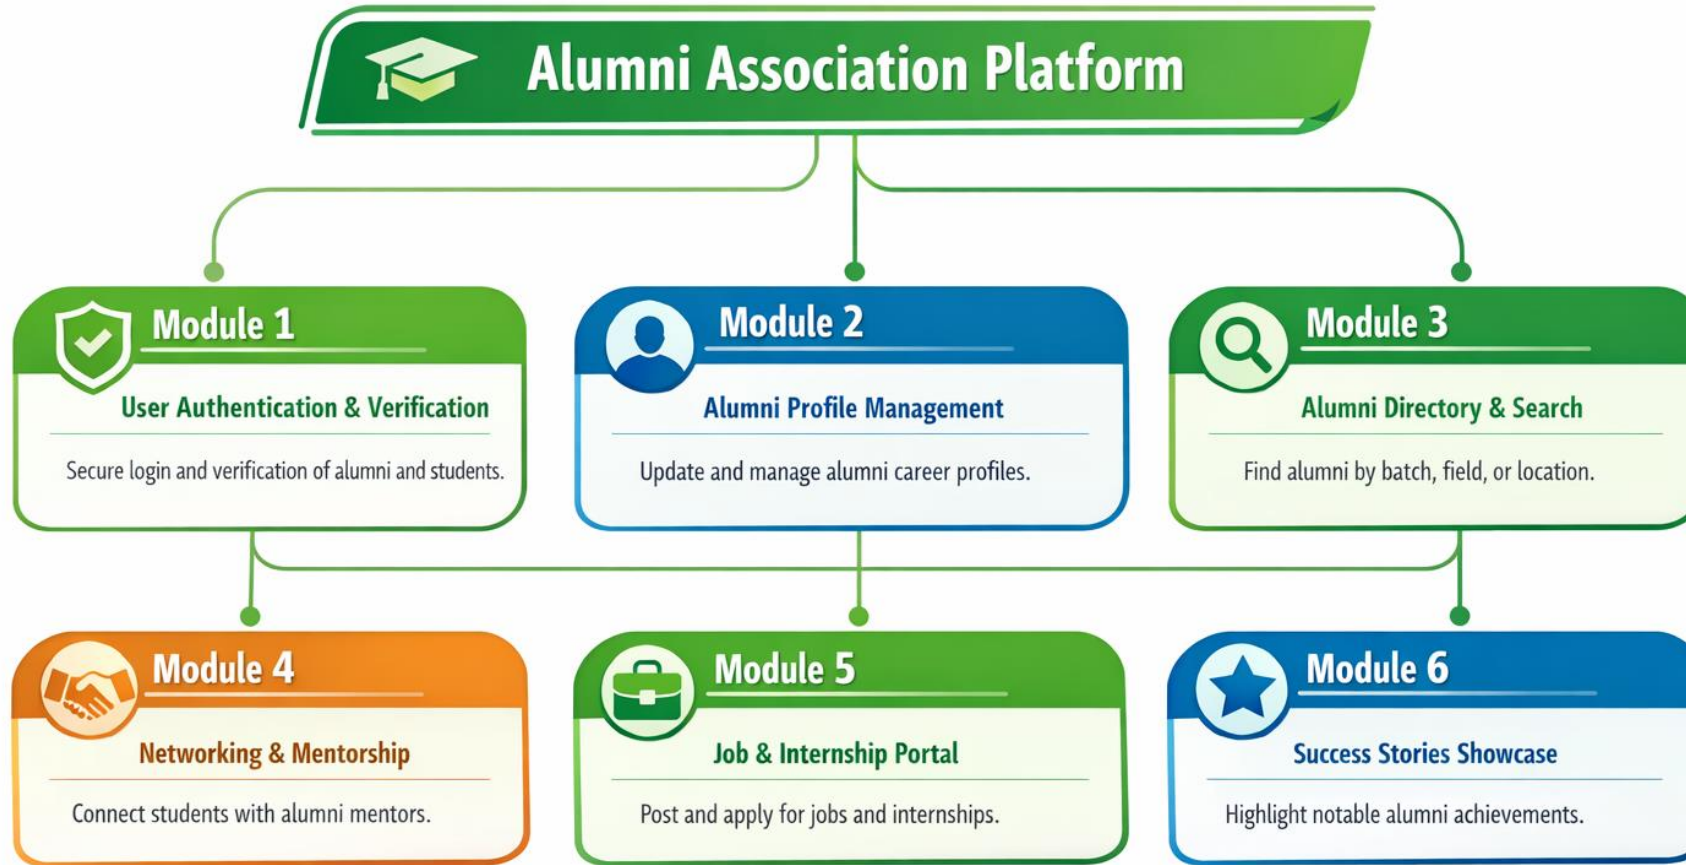

PROPOSED SOLUTION

The proposed solution is a centralized web and mobile-based Alumni Association platform that digitally connects alumni, students, and the institution. It enables verified alumni registration, professional networking, job postings, and mentorship opportunities. The system also supports event management, success story tracking, and structured feedback collection. Overall, it strengthens alumni engagement and supports career development and institutional growth through a secure and scalable digital ecosystem.

MODULES

REQUIREMENTS

Front End

Web: React.js + Tailwind

Mobile: React Native

Back End

Node.js

Express

Database

PostgreSQL
