## PROFILE SUMMARY

Cybersecurity student with strong knowledge in networking, ethical hacking, and Operating System. Seeking a cybersecurity analyst role to apply technical and analytical skills. Looking for a role where I can learn and work on security and incident response.

## EDUCATION

### Sri Shakthi Institute of Engineering and Technology

B.E. Computer Science Engineering

(Cyber Security): CGPA: 7.3/10

Coimbatore, Tamil Nadu

Sep 2023 - Sep 2027

### P.A.C.R Memorial Higher Secondary School

HSC: Grade: 78.6%

SSLC: Grade: pass

Rajapalayam, Tamil Nadu

June 2022 - Apr 2023

June 2020 - Apr 2021

## SKILLS

- **Programming Languages:** C, Python
- **Databases:** MySQL, MongoDB
- **Tools & Tech:** GitHub, Linux

## PROJECTS

### Automated Resume Analyzer in AI | Python (NLP, Flask):

- Built a Flask-based web application that automatically analyzes resumes and provides structured feedback.
- Implemented Natural Language Processing (NLP) techniques to extract skills, education, and experience from uploaded resumes.
- Supported multiple input formats (PDF, DOCX) with accurate parsing.
- Added error handling and validation for incorrect or corrupted resume files.
- Designed a scoring system to compare resumes with job descriptions and highlight missing skills/keywords.

### USB Forensics and Monitoring Toolkit:

- Developed a Python-based USB forensics toolkit to monitor USB plug/unplug events.
- Implemented real-time USB detection using PyWin32.
- Logged all USB events with timestamps in a secure JSON evidence file.
- Designed a Tkinter GUI dashboard to display USB activity logs clearly, helped identify unauthorized USB usage and possible data theft attempts.
- Supported basic digital forensic investigation through USB history analysis.

### Unified Blue Team Threat Detection and Alert System:

- Built a real-time security monitoring system using Python, Flask, Sysmon, and ELK Stack.
- Detected brute-force attacks, malware activity, unauthorized USB access, and network scans. Automated incident response actions such as blocking IP addresses and terminating suspicious processes.
- Integrated MITRE ATT&CK mapping, risk scoring, and automated alert generation.
- Developed a dashboard for centralized log analysis and threat visualization.

## CERTIFICATIONS

- Ethical Hacking for Beginners
- Introduction to Devops

# MUKESH P

Mukesh P | Mukeshp2005 | mukeshp1333

## EDUCATION

- Sri Shakthi Institute of Engineering and Technology  
B.E. Computer Science and Engineering (Cyber Security) | CGPA: 8.32 | Sep 2023 – May 2027 Coimbatore, India
- PSG Sarvajana Higher Secondary School  
Higher Secondary | Percentage: 85 | Jun 2021 – Apr 2023 | Coimbatore, India
- Krishnaswamy Nagar Ganga Nagar Matriculation School  
SSLC | Percentage: PASS | Jun 2020 – Apr 2021 | Coimbatore, India

## PROJECTS

### Multimodal Road Accident Detection System (Ongoing) | YOLOv8, OpenCV, EasyOCR | JUNE 2026

- Developed a real-time road accident detection system that analyzes CCTV and dashcam video streams using a dual-model YOLOv8 pipeline for vehicle detection and accident classification.
- Implemented Transfer Learning to train a custom accident detection model and integrated OpenCV with EasyOCR to automatically extract and recognize vehicle number plates from detected accident frames.
- Containerized the application using Docker and initiated deployment on AWS EC2; currently improving model accuracy through dataset refinement and resolving cloud inference challenges.

### System Activity Tracker | Python, React, Electron.js, SQLite | APRIL 2026

- Build a desktop security & productivity suite using Python, Electron and react to track low level Windows OS events in real time.
- Developed an offline-first ransomware detection system that detects mass file deletions and triggers instant OS and email alerts.
- Designed an WMI-based USB activity tracker with local SQLite storage to monitor file transfers while ensuring complete data privacy.

### Multi TWS Audio Streaming System | ffmpeg , Node.js | JUNE 2025

- Built a Multi-TWS Audio Streaming system that captures Windows system audio using FFmpeg and streams it to multiple smartphones simultaneously through an OTP-secured Node.js backend.
- Designed a browser-based mobile receiver, allowing users to listen without installing any app—making the solution universally accessible across Android and iOS.
- Engineered a unique alternative to Bluetooth by enabling unlimited users to hear the same audio over the internet, overcoming Bluetooth's 1–2 device limitation.

### Cross-Platform File Sharing App | Flutter, Firebase | OCT 2024

- Designed and developed a user-friendly app for secure file sharing across Android, iOS, Windows, macOS, and Linux from a single codebase.
- Integrated Firebase Authentication for seamless, secure sign-up and login, ensuring only authorized access to file sharing.
- Enabled real-time file transfers, format conversions, and delivered a smooth, responsive interface with instant notifications for a seamless user experience.

## TECHNOLOGIES

- Languages:** Python, Core Java, C
- Databases:** MySQL, MongoDB
- Developer Tools:** VS Code, GitHub, Android Studio, Docker, FFmpeg, AWS EC2
- Technologies/Frameworks:** Flutter, Node.js, Firebase, Electron, Flask, React.js, YOLOv8

## CERTIFICATION

- Introduction to Flutter - Simplilearn (2024)
- Lean Six Sigma Yellow Belt - Vision Excellence (2024)
- Fundamentals of Language Translation - Microsoft (2025)
- Python Basics - HackerRank(2025)

# NAGA ARJUN N

## SKILLS

### Programming Languages

C, Python

### Databases

MySQL, MongoDB

### Tools & Tech

Git, AWS

### Cyber

Network Security, Ethical Hacking

## PROJECTS

### AI Assistant for Cyber Law | Python, NLP (spaCy, NLTK)

- Built an AI-powered legal assistant using Natural Language Processing techniques with spaCy and NLTK, achieving 90% accuracy in extracting relevant legal
- Enabled quick query responses to complex legal questions, improving user understanding of cybersecurity and data privacy regulations by 50%.
- Engineered modular NLP pipelines for easy extension to additional legal domains in future enhancements.

### USB Monitoring Toolkit | Python, HTML, CSS

- Developed a USB Monitoring Toolkit to track USB device activities on a system. The tool records device connection and removal details using log files.
- Implemented a basic analyzer to examine logs and identify suspicious usage. Helps prevent unauthorized data transfer and improves system security.
- Useful for monitoring and digital forensic analysis.

## Profile Summary

Results-driven Cybersecurity student with foundational expertise in network security, network analysis, ethical hacking, and Vulnerability Assessment and Penetration Testing (VAPT). Skilled in detecting vulnerabilities, assessing risks, and understanding penetration testing techniques to improve system defenses. Adept at analyzing cyber incidents, troubleshooting security issues, and applying problem-solving strategies to mitigate risks. Strong analytical thinker with a proactive learning attitude and commitment to implementing industry best security practices.

## Education

**BE.CSE(Cyber Security), SRI SHAKTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY** 2023 – 2027  
CGPA: 7.2 Coimbatore, India

**HSC, Sri Sowdambika Convent Matriculation Higher Secondary School** 2022 – 2023  
Percentage: 56.7% Virudhunagar, India

## Technical Skills

### Core Skills

- Networking Protocols (TCP/IP, UDP, DNS, HTTP/HTTPS)
- Cyber Attack Analysis & Threat Identification
- Security Monitoring & Incident Response (Entry-level)
- Network Traffic Analysis & Packet Inspection
- Linux & Windows Security Environments

### Documentation

Research Papers, Technical Reports, Structured Documentation

### Technical Tools

- Kali Linux | Wireshark | Nmap | Metasploit
- Oracle VirtualBox | VMware Workstation

## Project Experience

**VirusPedia – Cybersecurity Knowledge & Threat Intelligence Platform** 08/2025 – 11/2025  
Developed a centralized cybersecurity intelligence platform integrating VirusTotal and AlienVault OTX APIs to provide real-time malware analysis, threat intelligence feeds, and interactive visualization of malware behavior, severity, and attack indicators.

**AI-Based Packet Sniffer for Secure Traffic Analysis** 03/2025 – 06/2025  
Built an AI-driven network packet sniffer that captures and analyzes live traffic, extracts key packet attributes, and leverages machine learning to detect anomalous and potentially malicious network activities in real time.

## Publications

**AI-Based Packet Sniffer for Secure Traffic Analysis, IJRPR publication** 01/05/2025

2021 – 2023

## PROJECTS

### Biometric Bus Attendance System

[GitHub](#) — [Live](#)

July 2025

- Built an IoT-based biometric attendance system using the R307 fingerprint sensor and ESP32 for fast, secure, and accurate student verification during bus boarding and departure.
- Integrated Supabase backend for real-time attendance logging, cloud synchronization, and admin monitoring to allow staff to track attendance remotely.
- Connected embedded IoT firmware with a responsive web dashboard for administrators to manage attendance, view logs, and generate reports efficiently.
- **Tech Stack:** ESP32, R307, Supabase, React, Node.js

### Clyra – P2P Real-Time Chat System

[GitHub](#) — [Live](#)

Oct 2025

- Developed a low-latency peer-to-peer chat system using WebRTC DataChannels and Socket.IO to ensure reliable message delivery with minimal lag in all network conditions.
- Implemented Google Authentication, ephemeral encrypted messages that auto-delete in 30 seconds, and reconnection-safe signaling workflow for enhanced security and reliability.
- Built a scalable Node.js/Express signaling server with automatic ICE exchange and cleanup logic to maintain stable and persistent peer-to-peer connections.
- **Tech Stack:** React, Vite, WebRTC, Socket.IO, Firebase Auth, Node.js, Express

### NovaNet – LAN Automatic Software Installer

[GitHub](#) — [Live](#)

Aug 2025

- Designed a LAN-based auto installer supporting remote silent software deployment and real-time status tracking of client machines for enterprise environments.
- Implemented a high-speed TCP/UDP networking engine with multithreading and adaptive buffers to achieve seamless file transfers across multiple LAN clients simultaneously.
- Developed silent installers with retry logic, installer-specific execution paths, and detailed logging for reliable and efficient deployment across enterprise networks.
- Packaged server dashboard and Windows clients as standalone executables using PyQt5 and PyInstaller, simplifying deployment and management of client systems.
- **Tech Stack:** Python, PyQt5, TCP/UDP, PyInstaller

## TECHNICAL SKILLS

**Languages:** Python, Core Java, C, JavaScript

**Frameworks/Tech:** Django, Django REST Framework, React, Node.js

**Databases:** MySQL, MongoDB

**Tools:** VS Code, GitHub, Postman

**Platforms:** Vercel, Netlify

## PUBLICATIONS

## OBJECTIVE

DevOps Engineer and Developer with hands-on experience in Kubernetes orchestration, Docker container management, and automated infrastructure deployment. Passionate about eliminating operational bottlenecks, implementing robust monitoring solutions, and driving efficiency across the entire software development lifecycle.

## EDUCATION

Sri Shakthi Institute of Engineering and Technology

Sep 2023 - Present

B.E. Computer Science and Engineering (Cyber Security):

CGPA: 7.46/10

Coimbatore, India

Vaigai Matriculation Higher Secondary School

June 2022 - Apr 2023

HSC: Grade: 78%

Salem, India

## SKILLS

- **Programming Languages:** Java, C, Python, SQL
- **Frameworks:** Spring Boot
- **Databases:** MySQL, MongoDB, PostgreSQL, Supabase
- **Tools & Tech:** Postman, Git, GitHub, Linux, Maven, Prometheus, Grafana
- **DevOps & Cloud:** Docker, Jenkins, Git Actions, Kubernetes, Amazon (EC2, S3, VPC, EKS, ECS, ECR)

## PROJECTS

### Kubernetes Deployment Strategies| Docker, Kubernetes, Prometheus, Grafana

**Abstract:** Designed and executed container orchestration strategies demonstrating seamless application updates, high availability, and automated failover capabilities within a Kubernetes environment.

- Configured and monitored rolling updates to smoothly transition live applications from version v1 to v2 without user-facing downtime.
- Implemented automated rollback mechanisms to immediately restore stable states upon detecting simulated deployment anomalies, minimizing potential service downtime.
- [Link: https://github.com/Suganth46/Kubernetes-Deployment-Strategies](https://github.com/Suganth46/Kubernetes-Deployment-Strategies)

### Cloud-Native Quiz Application with CI/CD Pipeline | Git Actions, Docker, AWS EC2, Spring Boot

**Abstract:** Built a RESTful Quiz application using Spring Boot and MongoDB, fully containerized with Docker and deployed to AWS EC2 through an automated CI/CD pipeline.

- Containerized the application with Docker and automated image builds and pushes to Docker Hub using GitHub Actions.
- Deployed the application on AWS EC2 with secure SSH-based remote deployment, environment-based secret management, and auto-restart container policies for high availability.
- [Link: https://github.com/Suganth46/Quiz\\_Game](https://github.com/Suganth46/Quiz_Game)

### Lan Based Automatic Software Installation System | Python

**Abstract:** Built a centralized deployment system to automate software installation across multiple LAN-connected PCs from a single control machine. Features include auto-discovery of clients via UDP broadcast, high-speed chunked file transfer and silent automated installation to reduce manual effort and human error.

- Implemented a reliable networking engine using multithreading and adaptive socket buffers.
- Designed a user-friendly operator dashboard using PyQt5 and packaged the system as standalone executables.
- [Link: https://github.com/Suganth46/Lan\\_Based\\_Software\\_Installation.git](https://github.com/Suganth46/Lan_Based_Software_Installation.git)
